

Peng Tang

(805) 861-3428 | pengtang157@gmail.com | <https://linkedin.com/in/pngtng>

Skills

Languages & Frameworks: C++, HTML/CSS, Java, JavaScript, Next.js, Node.js, Python, React, Tailwind CSS

Tools & Platforms: Git, Google Sheets, Linux, Microsoft Excel, Neo4j, PMS Software, Shell

Education

California Polytechnic State University, San Luis Obispo

Aug 2026 - Present

B.S. Computer Science

- Relevant Coursework: Algorithms and Complexity, Intro to Database Management Systems, System Software Mechanics, Engineering Statistics

Moorpark College

Aug 2023 - May 2026

A.S. Computer Science, Physics, and Mathematics | A.A. Natural Science

- Relevant Coursework: C++, Object-Oriented Programming, Data Structures, Computer Architecture
- Honors Club Vice President

Work Experience

Utility Logger, Month2Month by Holidale

Mar 2024 - Aug 2024

- Logged 5 utility bills for 140+ properties
- Maintained data consistency across 650+ properties using Google Sheets and Property Management Systems (PMS)
- Negotiated cost-saving measures with representatives and collaborated with property owners and management teams
- Coordinated across time zones with a China-based team, communicating in English and Mandarin to bridge US and China working hours

Extracurricular

Programmer, African Californios

Aug 2026 - Present

- Contributed to African Californios, a Cal Poly Institute for Advanced Technology and Public Policy (IATPP) digital archive built with Next.js, TypeScript, and Tailwind CSS, visualizing historical family trees and geographic data from 1769–1850
- Researching a Neo4j-based algorithm to map complex family trees up to four generations using baptismal and census records

Cohort 5 Scholar, AI LA IDEAS

Apr 2025 - Jul 2025

- Completed the Machine Learning Specialization (Coursera with Andrew Ng) through AI LA IDEAS, covering supervised and unsupervised learning, neural networks, decision trees, and recommender systems
- Organized weekly coffee chats to build community among cohort members

Logistics, HackCC

Sep 2024 - Nov 2025

- Organized a Community College oriented Hackathon for 250+ students and handled a \$10,000 budget
- Coordinated biweekly team communications and built the run-of-show across all organizing divisions
- Cold-emailed community colleges and universities across California to recruit host sites

Programmer, 4414 HighTide Robotics

Jul 2022 - Jun 2023

- Programmed robot subsystems (arm, intake, and shooter) and autonomous routines
- Integrated a Limelight to detect and map AprilTags for autonomous pathfinding across the play field
- Collaborated with the driver and coach to tailor a competitive, ergonomic controller configuration
- Tuned gains on the integrated PID control loop on CTRE Falcon motors to maximize drivetrain performance
- Cross-referenced FIRST-provided OnShape field models against certified game field measurements to fine-tune the robot's automation
